2017 ONCOLOGY ANNUAL REPORT

24 Six Pine Ranch Road • Batesville, IN 47006

MARGARET MARY CANCER CARE SERVICES

At Margaret Mary Health, our cancer program is committed to providing a full range of services for the prevention, detection, diagnosis, treatment and support of our cancer patients and their families. We believe in a holistic approach to cancer care, encompassing the body, mind and spirit of each patient, as well as their family. We recognize and address cancer as a continuum of care, including education, screening, diagnosis, treatment and survivorship. We pride ourselves on offering support related to social, nutritional, spiritual and end-of-life care. MMH's cancer program is accredited by the American College of Surgeons, Commission on Cancer.

ONCOLOGISTS/PROVIDERS

- Dr. Howard Cooper, Hematologist/Oncologist
- Dr. William Dugan, Hematologist/Oncologist
- Dr. Frank "Woody" Peyton, Radiation Oncologist
- Sarah Todd, NP-BC, Medical Oncology

WHAT WE OFFER

MMH's cancer center diagnoses, treats and supports patients with cancer and blood diseases. We offer:

- Medical oncology
- Hematology
- Radiation oncology
- Cancer education and support
- Nutrition counseling
- Distress screening
- Survivorship planning
- Navigation
- Screenings
- Comfort touch/massage
- Boutique
- Financial assistance

CLINIC PHONE NUMBERS

- Medical Oncology 812.933.3709
- Medical Oncology Fax 812.933.3774
- Radiation Oncology 812.933.3772
- Radiation Oncology Fax 812.933.3719

ADMINISTRATIVE TEAM

- Joe Heckman, MBA, BSN, RN
Program Director 812.933.3718
- Heather Bennett, BSN, RN
Medical Oncology Supervisor 812.933.3709
- Brenda Winters, RT(R)(T)
Radiation Oncology Supervisor.. 812.933.3721

SPECIALIST TEAM

- Nancy R. Meyer, BSN, RN, OCN
Oncology Nurse Specialist 812.933.3744
- Kari Ann Rennekamp, BSW MSM, CFSW
Patient Support Coordinator 812.933.3741
- Cassie Nobbe, CTR
Cancer Registry Coordinator 812.932.4673, x3120
- Mary Cross, RPH
Oncology/Outpt Pharmacist 812.932.4673, x3102
- Sarah Heffron, M.Ed, RD, LD
Dietitian 812.933.3790
- Carla Stenger, CMT
Massage Therapist 812.933.3779

MEET OUR ONCOLOGISTS

HOWARD COOPER, DO

Dr. Cooper diagnoses and treats patients with all types of cancer and blood disorders. He comes to us from IU Health Central Indiana Cancer Centers in Indianapolis. He completed his Hematology/Oncology fellowship in 2006 at the University of Kentucky Medical Center. Dr. Cooper is board certified in hematology, medical oncology and internal medicine and is a member of the American Society of Clinical Oncology, as well as the American Society of Hematology.

WILLIAM DUGAN, MD

A board-certified and board-eligible hematologist, Dr. Dugan has been practicing medicine for over 40 years throughout rural Indiana. He treats adults with all types of cancer and blood disorders and has special interests in prostate and breast cancers. Dr. Dugan co-founded Indiana Community Cancer Care and is past president of the Association of Community Cancer Centers and the Indiana Division of the American Cancer Society. He received the National Rural Health Association's "Rural Practitioner of the Year" award and a Sagamore of the Wabash appointment.

FRANK PEYTON, MD

Dr. Peyton is a board-certified radiation oncologist who currently sees patients at both Margaret Mary's Cancer Center and St. Vincent Hospital of Indianapolis. He graduated from Indiana University Medical School and completed his internship through the Indiana University Medical Center and his residency through University Medical Center. Dr. Peyton has participated in several professional societies and committees, is involved in numerous medical research groups and is a published author.

NUTRITION SERVICES

Good nutrition is vital to successful cancer treatment as it helps our patients to heal, repair and regain strength. All of our patients have free access to comprehensive nutrition services from our registered dietitian, Sarah Heffron. Meeting with our dietitian often helps patients:

- Minimize and manage treatment side effects
- Stay well nourished and able to tolerate treatment
- Learn overall healthy nutrition
- Improve quality of life

Patients may request a consultation at anytime during treatment or our staff may refer patients as needed. Sarah can be reached by calling 812.933.3790 or 812.934.6624, ext.1318.

OUR CANCER SCREENINGS

BREAST CANCER SCREENINGS

Regular screening mammography for the early detection of breast cancer is essential for good treatment outcomes. Annual mammograms are recommended for most women starting at age 40, or sooner for those with a family history and/or doctor's order. For more information, contact our breast health navigator, Kim Oblinger, RN at 812.933.5308. MMH also offers financial assistance for mammograms to women who are uninsured and meet certain, age, financial and other program criteria. Patients can find out if they qualify by calling Melissa Boor at 812.933.5583.

CERVICAL CANCER SCREENINGS

Cervical cancer can often be found early and sometimes even prevented entirely by having regular Pap tests. For women who meet specific financial criteria, free cervical screenings are periodically offered at the Southeastern Indiana Health Center in partnership with MMH. Patients should contact their primary care provider or the Southeastern Indiana Health Center at 812.932.4515 for more information.

PROSTATE SCREENINGS

Prostate cancer is the most common cancer among men (after skin cancer), but it can often be treated successfully. Free to men, these screenings include a rectal exam and blood work. Our prostate screenings typically occur twice a year in Brookville and Batesville. For more information, call 812.933.5583.

LUNG CANCER SCREENINGS

Lung cancer is the leading cause of death in the U.S., yet if detected early, it can be cured. Our lung cancer screening program can catch lung cancer in its earliest stages and provides personalized treatment to improve survival. To learn more, call 812.933.3752.

SKIN CANCER SCREENINGS

More skin cancers are diagnosed in the U.S. each year than all other cancers combined. Most skin cancers are caused by too much exposure to UV rays. Most of this exposure comes from the sun, but some may come from man-made sources, such as indoor tanning beds and sun lamps. Most skin cancers can be found early with skin exams. Exams by your doctor, skin cancer screening events and checking your own skin frequently can help find cancers early, when they are easier to treat. Contact your primary care physician or the MMH cancer program at 812.933.3744 to learn more.

COLORECTAL CANCER SCREENINGS

Colorectal cancer is the second leading cause of death from cancer in the U.S. Colorectal cancer almost always develops from pre-cancerous polyps in the colon or rectum. Screening tests can find precancerous polyps, so they can be removed before they turn into cancer. They can also detect cancer early, when treatment works best. Colorectal cancer screening may entail checking for signs of blood in a stool sample to conducting a screening colonoscopy, so it is best to check with your primary care physician to determine which screening is best for you. To learn more, contact the Community Health Improvement Department at 812.933.5583.

OUR SUPPORT SERVICES

BEHAVIORAL HEALTH

At MMH, we understand the emotional toll a cancer diagnosis can create. That's why we offer support to patients struggling with personal issues. Our professional staff can assist with anxiety, depression, coping and other emotional burdens. To learn more, call Malissa Hohenstein at 812.933.5540.

BOUTIQUE

Our boutique offers a variety of products and services designed to help women manage the physical appearance changes brought on by cancer and its treatment. To learn more, call Meg Applegate at 812.933.5257.

BRAIN INJURY SUPPORT

This support group is designed for people living with brain cancer or a brain injury. Family and friends are welcome to attend. To learn more, call Brandi Hofer, 812.934.6638 or Jean Capler, 812.325.6342.

BREAST CANCER SUPPORT

This support group is for those with breast cancer at any stage of survivorship. To learn more, call Kim Oblinger, RN at 812.933.5308.

COMFORT TOUCH

During active treatment, our massage therapist, Carla Stenger, offers complimentary massages and comfort touch. These services provide patients with feelings of peace and decreased pain, anxiety, nausea and fatigue. To learn more, call Carla at 812.933.3779.

FINANCIAL ASSISTANCE

Our staff provides help finding financial assistance and grants to offset expenses from deductibles and co-payments. For more information, call Kari Ann Rennekamp at 812.933.3741.

NUTRITION SERVICES

Our registered dietitian, Sarah Heffron, is available to provide nutritional support. To learn more, call Sarah at 812.933.3790.

LOOK GOOD, FEEL BETTER

This group class is designed for women to pamper themselves, learn make-up tips and try new wigs and head coverings. To learn more, call Kari Ann Rennekamp at 812.933.3741.

PATIENT WORKSHOPS

These workshops are designed to support our patients. Free dinner, speakers and door prizes are provided. To learn more, call Kari Ann Rennekamp at 812.933.3741.

CAREGIVER WORKSHOPS

These workshops are designed to support caregivers. Free dinner, speakers and door prizes are provided. To learn more, call Kari Ann Rennekamp at 812.933.3741.

PATIENT & CAREGIVER WORKSHOPS

These workshops are designed to support patients and their caregivers together. Free dinner, speakers and door prizes are provided. To learn more, call Kari Ann Rennekamp at 812.933.3741.

PRAYER & SPIRITUALITY SUPPORT

Chaplain support and prayer chains are available. To learn more, call Kari Ann Rennekamp at 812.933.3741.

RELAY FOR LIFE

This 24-hour event raises money for cancer research and funding of local support programs. It also honors cancer survivors and remembers those we have lost. To learn more, call Kari Ann Rennekamp at 812.933.3741.

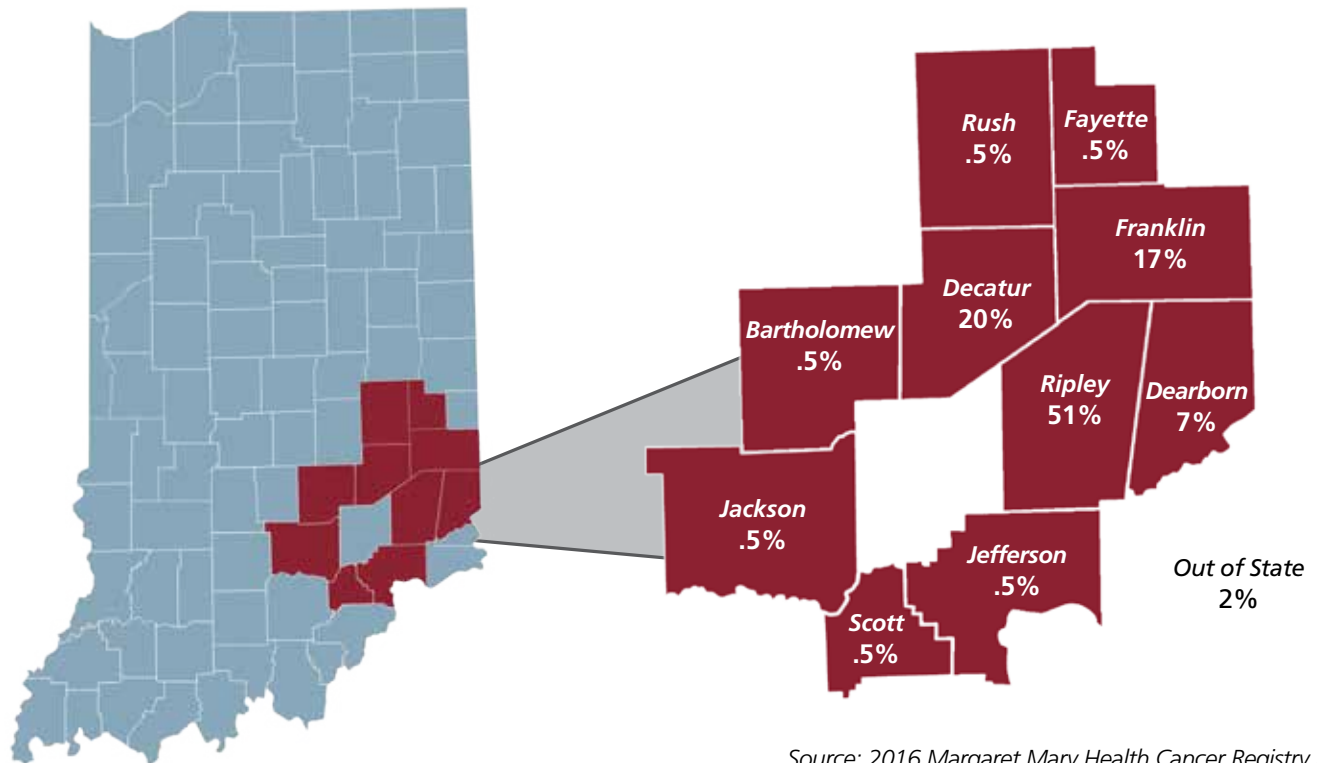

THINK PINK

This fun girls' night out raises awareness for breast cancer. To learn more, call 812.933.5257.

TRANSPORTATION ASSISTANCE

If you need transportation assistance, we can help. To learn more, call Kari Ann Rennekamp at 812.933.3741.

COUNTY OF RESIDENCE AT DIAGNOSIS - ALL CANCER TYPES

Source: 2016 Margaret Mary Health Cancer Registry Data

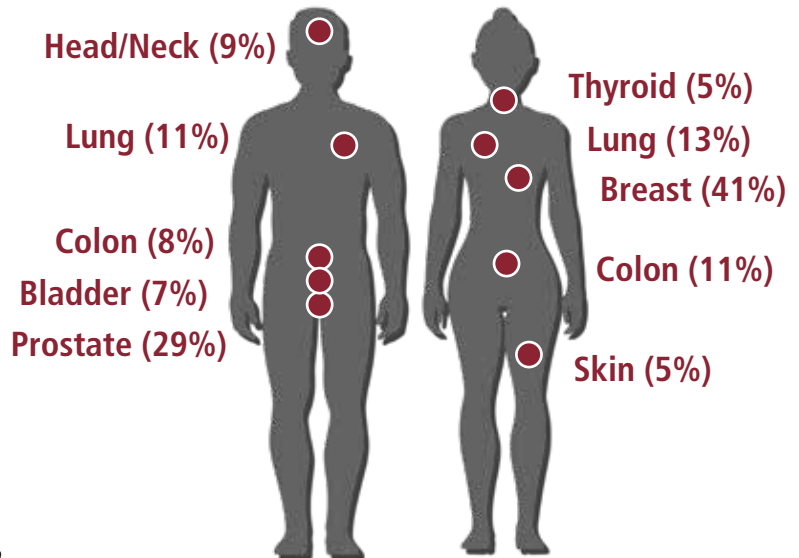

STANDARD 4.4: ACCOUNTABILITY MEASURES - BREAST

	2013	2014	2015
Radiation therapy is administered within one year (365 days) of diagnosis for women under age 70 receiving breast-conserving surgery for breast cancer	100%	100%	100%
Radiation therapy is recommended or administered following any mastectomy within one year of diagnosis of breast cancer for women with ≥ 4 positive regional lymph nodes	No Data	No Data	No Data
Tamoxifen or third generation aromatase inhibitor is considered or administered within one year (365 days) of diagnosis for women with AJCC T1c N0 M0 or Stage II or III ERA and/or PRA positive breast cancer	100%	100%	100%

The performance rates shown provide MMH's Cancer Committee with an indication of the proportion of patients treated according to recognized standards of care by diagnosis year. The proportions are computed based on data directly reported from the Cancer Registry to the National Cancer Database. Cases in which no data is displayed indicates no cases met the criteria for the measure during the stated timeframe.

TOP 5 CANCER SITES:

*Men vs.
Women*

Source: 2016 Margaret Mary Health Cancer Registry Data

STANDARD 4.5: QUALITY IMPROVEMENT MEASURES

		2013	2014	2015
Colon	At least 12 regional lymph nodes are removed and pathologically examined for resected colon cancer. [12RLN]	100%	100%	100%
Rectum	Preoperative chemo and radiation are administered for clinical AJCC T3N0, T4N0 or Stage III; or Postoperative chemo and radiation are administered within 180 days of diagnosis for clinical AJCC T1-T2N0 with pathologic AJCC T3N0, T4N0 or Stage III; or treatment is recommended for patients under age 80 receiving resection for rectal cancer	100%	100%	100%
Breast	Image or palpation guided needle biopsy to the primary site is performed to establish the diagnosis of breast cancer	86.4%	83.3%	100%
Gastric	At least 15 regional lymph nodes are removed and pathologically examined for resected gastric cancer	No Data	No Data	No Data
Lung	Surgery is not the first course of treatment for cN2, m0 lung cases	100%	No Data	No Data
	Systemic chemotherapy is administered within four months to day preoperatively or day of surgery to six months postoperatively, or it is recommended for surgically resected cases with pathologic lymph node-positive (pN1) and (pN2) NSCLC	No Data	100%	100%

The performance rates shown provide Margaret Mary Health's Cancer Committee with an indication of the proportion of patients treated according to recognized standards of care by diagnosis year. The proportions are computed based on data directly reported from the Cancer Registry to the National Cancer Database. For cases in which no data is displayed indicates that no cases met the criteria for the measure during the stated timeframe.
