

THE BEE AWARD NOMINATION

At Margaret Mary Health, our goal is to create a culture where we positively impact every human experience within our walls. This means how we act, how we communicate and how we do our jobs should have a positive impact on every single person we meet - whether it's a patient, another team member, or a provider.

Everyone in health care plays an essential role in patient care, even if they don't spend their time on the front line. Our team members pool their knowledge and experience to work as a team and create a culture of mutual support and trust.

The BEE Award was established to recognize the tremendous contribution of our non-nursing team members whose support greatly impacts patient care and quality of outcomes. Such individuals stand out among their peers not only for the successful execution of their work assignments, but also because of their dedication, creativity and actions toward improving the atmosphere we all work in and increasing the welfare of patients and fellow team members.

Join us in celebrating all of our team with a 'Bringing Excellence Every' Day nomination.

BEE Award Criteria

- Regularly collaborates with other departments in the cross-functional team and contributes ideas to ensure an optimal patient approach
- Communicates clearly and effectively to promote positive relationships
- Demonstrates a proactive approach and caring attitude
- Fosters an environment which encourages respect, integrity, fairness and diversity
- Recognizes others for their contributions to Margaret Mary Health
